STRUCTURED PROGRAMMING November 2014	Date	

THE KENYA NATIONAL EXAMINATIONS COUNCIL

DIPLOMA IN INFORMATION COMMUNICATION TECHNOLOGY MODULE I

STRUCTURED PROGRAMMING

3 hours

INSTRUCTIONS TO CANDIDATES?

Time: 3 hours

Write your name and index number in the spaces provided above.

Sign and write the date of examination in the spaces provided above.

Answer FIVE of the following EIGHT questions in the spaces provided in this paper.

Candidates should answer the questions in English.

For Examiner's Use Only

Question	1	2	3	4	5	6	7	8	Total Score
Candidates Score									

This paper consists of 20 printed pages.

Candidates should check the question paper to ascertain that all the pages are printed as indicated and that no questions are missing.

© 2014 The Kenya National Examinations Council.

(a)	State two activities that take place during subprogram maintenance.							(2 marks
(b)	(i) Outline four functions of a computer compiler.						(4 marks	
	(ii) S	State two advantages of bubble sort algorithm as used in computer programming.						(2 marks)
(c)	Differen	liate betwe	en <i>tech</i>	nical de	cumentati	on and user docun	tentation.	(4 marks)
				600	Prio .			
(d)	Write a G control s 1 2 3 4 5	2 4 6 8	3 6 9 12 15	4 8 12 16 20	5 10 15 20 25	erate the following	output. Use	for loop (8 marks)

(a)	Defin	ne the term <i>list</i> as used in programming.	(2 n
			50.50
75.5	ets.	D 2 1 51 51 50	
(b)	(i)	Describe each of the following terms as used in programming:	(2 n
		I. structured programming;	1211
		6.02	
		II. web scripting programming.	(2 n
	(ii)	Under what circumstance would a programmer choose to use f	ifth genera (2 n
	10.00	programming language.	

The following is a Pascal program structure declaration. Use it to answer the question (c) that follows. Struct account Char accname[20]; Int accno; Char acctype[7]; Float lastdep; Float accbalance;);oldmember, newmember; (4 marks) Interpret the program segment. Write a Pascal program that reads the following data from an input text file and then the (d) Program generates the output shown below computing the highest mark and average mark. Input file Computer Student name Mathematics English Charlyn Nicholson 50 70 50 80 45 50 Charles Peter 69 80 Catherine Brian Output file Highest Mathematics English Computer Student name Average 70 50 Charlyn Nicholson 50 Charles Peter 50 80 45 90 69 Catherine Brian 80 (8 marks)
